
Commutative Coherent Rings

commutative semi-coherent and semi-regular rings - semi-coherent and semi-regular rings 345 examples. (1) if r is coherent, then r is semi-coherent. for we have proved [8, theorem 1] that a commutative ring r is coherent if and only if $\text{hom}(b, c)$ is a flat r -module for every pair of injective r -modules b and c .

(see proposition 1.3 for the proof that such a ring is coherent.) **when is $c(x)$ a coherent ring? - ams** - 2. when is $c(x)$ a coherent ring? for rings, the next best thing to being semihereditary is to be coherent. a ring r is coherent if every finitely generated ideal is finitely presented. this means that there exists an exact sequence (2.1) $f_j \cdot a \rightarrow f \rightarrow 0$, where f is a finitely generated free r module and k is also finitely generated. theorem 2.2. **some results on coherent rings - american mathematical society** - some examples of coherent rings. the results on coherent rings stated in [1, p. 63, exercises 12a, g] first appeared in [3] which also gives other applications of coherent rings. in §2 of this note we show, among other results, that if a ring a is left (resp. right) coherent so is a_n , the n -matrix ring with coefficients - **on - coherence of rings** - on - coherence of rings zhu zhanmin abstract let n be a fixed positive integer. a ring r is called left n -coherent if every n -generated torsionless left r -module is finitely presented, some characterizations and applications of n -coherent rings are obtained. **the concise handbook of algebra, kluwer publ.
