
Compactification Of Siegel Moduli Schemes

toroidal compactification of siegel spaces - toroidal compactification of siegel spaces toroidal compactification of siegel pdf toroidal compactification of siegel spaces david bryant mumford (born 11 june 1937) is an american mathematician known for distinguished work in algebraic geometry, and then for research into vision and pattern theory. he won the fields medal and was a macarthur **toroidal compactification of siegel spaces by y namikawa ...** - this ebooks toroidal compactification of siegel spaces by y namikawa contains all the information and a detailed explanation about toroidal compactification of siegel spaces by y namikawa, its contents of the package, names of things and what they do, setup, and operation. before using this unit, we are encourages you **mumford compactification of siegel variety from the ...** - mumford compactification of siegel variety from the viewpoint of kahler-einstein metric yi zhang abstract. this article is a survey on recent progress of the author's joint program **compactifications of symmetric and locally symmetric spaces** - ization for real parabolic subgroups of siegel sets of rational parabolic subgroups and the reduction theory of arithmetic groups. therefore, compactifications of symmetric and locally symmetric spaces can be studied in parallel using similar methods. 2. compactifications of a locally symmetric space $n \times n$ can be studied and **the geometry on smooth toroidal compactifications of ...** - the geometry on smooth toroidal compactifications of siegel varieties shing-tung yau and yi zhang abstract. we study smooth toroidal compactifications of siegel varieties thoroughly from the viewpoints of mixed hodge theory and kahler-einstein metric. we observe that any cusp of a siegel space can be identified as a **on the graded ring of modular forms of the siegel ...** - rings of modular forms belonging to the siegel paramodular group $\Gamma_0(2)$ of degree two with polarization $\text{diag}(1,2)$. we also show that the satake compactification of the quotient variety by this group is rational. here, for each prime p , we define the group $\Gamma_0(p)$ by $\Gamma_0(p) := \{g \in \text{Sp}_4(\mathbb{Z}) \mid g \equiv \begin{pmatrix} * & * & 0 & 0 \\ * & * & 0 & 0 \\ 0 & 0 & p & 0 \\ 0 & 0 & 0 & 1 \end{pmatrix} \pmod{p}\}$, **topology proceedings 11 (1986) pp. 115-175: topology of ...** - compactification, a smooth manifold with boundary, in 2.4 the satake compactification, a singular projective variety, and in 2.5 the igusa compactification \mathbb{P}^3/r^* , a non-singular variety which is a desingularization of the satake compactification. **compactification of classical groups - intipress** - in this paper, motivated by the author's work on the compactification of symplectic group (see [9]), we compactify all the classical groups. one nice feature of our compactification is that the underlying compact space is a symmetric space of compact type. furthermore, for real groups, real analytic **cohomology of the satake compactification** - discovered a natural compactification \mathbb{P}^3/r^* , of this space obtained by attaching lower dimensional siegel spaces, so that as a set it was shown by borel and baily that the satake compactification has the structure of a projective algebraic variety (see [2]). **compactifications symmetric locally symmetric spaces** - 11.13 the oshima-sekiguchi compactification of g/k 253 11.14 comparison with g/h (r) 257 part iii compactifications of locally symmetric spaces 9 classical compactifications of locally symmetric spaces 267 m.1 rational parabolic subgroups 268 m.2 arithmetic subgroups and reduction theories 277 in.3 satake compactifications of locally symmetric ... **mixed hodge structures and compactifications of siegel's space** - mixed hodge structures and compactifications of siegel's space (preliminary report) james a. carlson, eduardo h. cattani and aroldo g. kaplanz 1 introduction let h/g be the siegel upper half-space of order g , and let $\Gamma = \text{Sp}(g; \mathbb{Z})$ be the siegel modular group. **introduction - american mathematical society** - the siegel modular variety of degree two and level three 3269 when $d=2$ the right-hand equation is an unambiguous definition in that we always assume the canonical choice has been made for the decomposition of the cone of **compactification of complete kähler surfaces with negative ...** - compactification of complete kähler surfaces with negative ricci curvature sai-kee yeung* ... the proof of the siegel's theorem relies on the result that the volume of zero divisor $[z]$ of a ... **theta functions - link.springer** - talking about what might be called a standard compactification. such a compactification was obtained first as a hausdorff space by i. satake in "on the compactification of the siegel space", j. ind. math. soc. 20, 259-281 (1956), and as a normal projective variety by w. l. baily in 1958 [1]. **(a b) - math.ou** - n'o. 4] proc. japan acad., 59, ser. a (1983) 139 an explicit dimension formula for the spaces of generalized automorphic forms with respect to $\text{Sp}(2, z)$ by ryuji tsushiy [a department of mathematics, gakushuin university (communicated by kunihiko kodaira, m.s. a., april 12, 1983) let β be the siegel upper half plane of degree g . there is a symplectic group $\text{Sp}(g, r)$ acts on \mathbb{P}^3 as $m.z = (az+b)/(cz+d)-1$, jor ...
